EDUCATION

Bocconi University   **Milan, Italy**
- Master in Data Science and Business Analytics – major in Data Science.   Sep 2019 – Jul 2021
- Final GPA: 29.7/30.
- Relevant Coursework: Advanced Statistics, Stochastic Processes, Optimization, Statistical Machine Learning, Deep Learning, Natural Language Processing, Computer Vision.
- Final Thesis: *Tempered Stochastic Search of Bayesian CART Models.*
  Supervisor: Professor Giacomo Zanella

Bocconi University   **Milan, Italy**
- Bachelor in Economics, Management and Computer Science.   Sep 2016 – Jul 2019
- Final GPA: 29.8/30. Graduation mark: 110 **cum laude**.
- Relevant Coursework: Economic Theory, Statistics, Machine Learning, Algorithms, Programming (Python).
- Final Thesis: *Machine Learning for Imbalanced Data. An application to Customer Complaints.*
  Supervisor: Professor Daniele Durante.

Carnegie Mellon University   **Pittsburgh, PA, USA**
- Exchange University. Semester GPA: 3.75/4.   Jan – May 2019
- Exchange Coursework: Modern Data Management, Advanced Statistics for Data Analysis, Data Mining.

Clover High School   **Clover, SC, USA**
- Exchange High School. Final GPA: 98/100.   Aug 2014 – Jan 2015

Liceo Norberto Rosa   **Bussoleno, Italy**
- High School diploma in Scientific Subjects, 5 years. Final mark: 100/100 **cum laude**.   2011 - 2016

RESEARCH AND WORK EXPERIENCE

Bocconi Institute for Data Science (BIDSA)   **Milan, Italy**
Student Researcher. Supervisors: Professor Daniele Durante and Professor Giacomo Zanella.   Mar 2020

  Analysis and presentation of seminal and state-of-the-art papers to colleagues and professors. Main subjects tackled: Bayesian Nonparametrics, Probabilistic Machine Learning, Markov Chains and MCMC methods.

Goldman Sachs   **Warsaw, Poland**
Summer Analyst in the Technology Division.   Jul – Sep 2018

  Developed innovative and effective backend infrastructure to improve ease of creation of financial products.
  Main technologies used: Python and Java.

IGIER Research Center – Bocconi University   **Milan, Italy**
Research Assistant. Team leader: Marco Tabellini (Harvard).   Jan– Jun 2018

  Explored applications of Natural Language Processing techniques in the economic and social sciences literature. Studied, presented, and applied Latent Dirichlet Allocation to 1920-1930 USA books and congressional speeches, seeking to detect racial themes and understand their connections with immigration.

Bocconi University   **Milan, Italy**
Notable academic project produced during studies.

- Designed a model to predict customer complaints on a high-dimensional dataset with drastic binary class imbalance.
- Performed simulation of phase transition and critical phenomena of Ising ferromagnet model using Metropolis-Hastings in Python. Investigated finite-size scaling and universality classes.

OTHER ACTIVITIES

Computational Society for Bocconi Students   **Milan, Italy**
Former co-founder.   Sep 2017 – Jun 2018

Founded first Computer Science student association in Bocconi. Provided programming training for members, discussed, and exchanged ideas on topics such as algorithms, dynamic programming and linear programming. Organized Python programming competitions, receiving unexpectedly high applications.

Bocconi University   **Milan, Italy**
Teaching Assistant. Course Director: Professor Fabrizio Iozzi.   Jan – Jun 2020

Teaching assistant for the undergrad course *Python Programming for Economics, Management and Finance*.
I contributed crafting the syllabus, preparing some of the lectures, in-class exercises, and student homework. I also acted as an in-class tutor during lectures.

RELEVANT SKILLS

Languages.

- Italian - Native speaker.
- English – Fluent. IELTS (score 8.5, writing 7.5, Nov 2017), (Score 8.5, writing 7.5, speaking 8.0, Oct 2020).
- French – Level B1 (Bocconi university test).

Programming.

Python (np, pandas, scikit, pyplot). **R**, fluent. Databases (MySQL, Tableau). Version control (Git). **LaTeX**.

Teamwork

I firmly believe that *teamwork*, *collaboration* and sharing of ideas are as important as being able to *work independently* and *self-responsibly*. About 30% of my academic courses included group works, which helped me perfect these skills.

ABOUT ME

- Passionate about math since high school: attended yearly advanced math and physics retreats.
- Participated to several hackathons regarding computer science, economics, and data science.
- Built a web platform to run Python programming competitions using Python (Flask, WebSockets, NGINX), running on UNIX server interacting with remote MySQL database (SQLAlchemy, PyMySQL).
- Attended course for Sommelier
- *Interests*: self-improvement, machine learning, hardware electronics, statistics, psychology, hiking in nature, rock-climbing, history and technology of medieval metallurgy.
- *Sport*: running, skying and gym. In the past, Judo for 5 years at a competitive level.
- I am curious, I like to explore different fields of knowledge and ask myself scientific questions about the things I read or that I discover through my hobbies and interests.
